Intern Summer Experience Internship Program 2015-Rockville, MD

ABOUT IAI:
Intelligent Automation, Inc. (IAI) is a technology innovation company that specializes in providing advanced technology solutions and R&D services to federal agencies, and corporations throughout the United States. IAI endeavors to maintain an inclusive and diverse environment in which staff members can fulfill their professional and personal objectives. IAI is seeking to hire the best and brightest future Research Scientists, Engineers, Software Developers, and Designers. Students who are historically underrepresented in the technology industry are encouraged to apply.

Internship Objective:

Project: A 12-week development project that will include working with senior technical staff in the areas such as Robotics, Cyber Security, Communications, Mobile Health, Big Data, Air Traffic Management, Sensors, Serious Games and Training Simulations.

Professional Development: Attend weekly meetings with your supervisor and advisor to report on project tasks.

Mentorship: Be matched with a mentor to help guide you through the summer experience program.

Fun: Social activities and team building in a tech savvy relaxed environment!

Minimum qualifications:

- Be currently enrolled in an accredited undergraduate or graduate program in the following areas of concentration: game design, game engineering, graphic design, computer science, computer engineering, computer systems engineering, and business.
- Minimum of a 3.0 G.P.A.
- Basic knowledge of the Adobe Suite, Autodesk Suite, and Unity
- Be able to commit to 12 weeks during the summer
- Strong desire and willingness to learn
