

Faculty Advisor:

Faculty Advisors are responsible for supporting a superior experience for all participants of the program through facilitation of educational curricula for the program. They participate in the experience by providing insight and perspective to our scholars related to the fields of engineering and technology through direct interactions during workshops and providing guidance and mentorship during the culminating student project. BFA, BS, or BA Required.

Operations Team:

Operations Team members are responsible for supporting a superior experience for all participants of the program through logistical support for all aspects of the program. They participate in the experience by providing support through effective supplies management, logistical coordination, and technical support. Upper level Game, CS, or Engineering student-status required.
